Mountain Weather Forecast

Brecon Beacons National Park

Forecast valid from 00:00 on Tuesday 18 Jan 2022 until 23:59 on Wednesday 19 Jan 2022

Forecast Issued on Monday 17 Jan 2022 at 15:41

Confidence: Remaining quite settled under the influence of high pressure but a return to cold conditions with northwesterly winds by Wednesday. Some frontal rain later on Wednesday morning adds some uncertainty to the amount of cloud likely and timings of rainfall may change.

Headline for Tuesday 18 Jan 2022: A dry, sunny day, strong southerly winds, more cloud later.

Mountain weather hazards on Tuesday 18 Jan 2022

Blizzards No Likelihood	**Heavy Snow** No Likelihood	**Storm force winds** No Likelihood
Gales No Likelihood	**Severe chill effect** Low Likelihood	**Poor visibility** No Likelihood

Forecast for Tuesday 18 Jan 2022

Weather: Dry with clear spells overnight, some mist forming. Once mist has cleared it will be dry and bright during the day with long sunny spells. Clouding over later in the afternoon and cloud thickening enough to give some drizzle or light later in the evening.

Chance of cloud free mountain/hill tops above 600m: 100% decreasing to 80% later in the day in association with thickening cloud.

Visibility: Occasionally poor in mist but becoming very good visibility during the morning and most of the afternoon. Later visibility will becoming moderate as cloud thickens, possibly poor in drizzly rain by early evening. Cloud will become scattered around 700m around western hills during the late afternoon.

**Level above which ground is expected to be frozen/snow is expected to settle.*

Meteorologist's View

Freezing level will be above all summits but will fall for a time during the day. Note the significant chill affect in strong winds and cooler air.

Recent rainfall: measured at Neuadd: altitude 353m

Recorded at	Last 24 hours:	Last 48 hours:	Last 72 hours:
15:00 on Mon 17 Jan 2022	0mm	0.8mm	0.8mm

Forecast for Wednesday 19 Jan 2022

Weather: Outbreaks of rain overnight will clear south by late morning with a fresher cooler feel to follow. Likely to be a lot of bright and dry conditions but perhaps the odd shower, perhaps wintery on summits, in the west. Feeling cold in the strong northwesterly winds with a significant windchill likely.

Maximum wind: Northwesterly 20 mph with gusts 30mph.

Chance of cloud free mountain/hill tops above 600m: 60% initially but improving to 90%, perhaps some patches of lower cloud with passing showers.

Visibility: Occasionally moderate at first but becoming very good for most of the day, dipping slightly in any showers.

Temperature: **Valleys:** Plus 8 Celsius falling to 2 Celsius later.
At 600m: Plus 4 falling to 1 Celsius.
Freezing level: Around 700m.
